GROUP PROJECTS:

➤ Restaurent website

The Tablet-based Food Ordering and Circus Ticket Reservation System for Restaurants is a user-friendly solution that simplifies the dining experience. It seamlessly integrates into restaurant operations, making things more efficient and boosting customer satisfaction. Customers can easily order food using tablets and even reserve tickets for circus shows, adding an extra layer of entertainment. Overall, it's a comprehensive system designed to enhance the overall dining experience.

Tools: Figma, Scrum,Trello, Miro, Html, Css and Javascript.

➤ Online book shop

The Online Book Selling Application is a strong e-commerce platform for selling books online. It offers a smooth shopping experience with user-friendly features. This application is designed to make book transactions easy for both book enthusiasts and sellers.

Tools: Python, Django, SQLite, Git, GitHub, HTML, CSS, Bootstrap5

SELF PROJECT:

➤ Portfolio

As a dedicated and results-driven Python Developer, I am thrilled to present a project that demonstrates my commitment to excellence and my ability to deliver creative solutions.

Tools: JavaScript, HTML and CSS
